***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Newton (3,701,264). Newton discloses an ejector device M' for a refrigeration cycle that includes a radiator/condenser C' for radiating heat of refrigerant compressed by a compressor VC', and an evaporator E' for evaporating refrigerant after being decompressed, the ejector decompression device M' comprising a nozzle 22' having an inner wall defining a refrigerant passage 105, for decompressing an expanding refrigerant flowing from the radiator C' by converting pressure energy of refrigerant to speed energy of the refrigerant, the nozzle including a throat portion having a cross-sectional area that is smallest in the refrigerant passage of the nozzle 22', and an expansion portion in which the cross-sectional area is increased toward downstream in a refrigerant flow, a pressure increasing portion that is disposed to increase a pressure of refrigerant by converting the speed energy of refrigerant to the pressure energy of refrigerant while mixing refrigerant injected from the nozzle and refrigerant sucked from the evaporator, and a needle valve 104 disposed in the refrigerant passage 105 of the nozzle 22', wherein the needle valve and the inner wall of the nozzle are provided to have predetermined shapes so that refrigerant flowing into the nozzle 22' is decompressed to a gas-liquid two-phase state at upstream from the throat portion in the refrigerant flow, a control means/actuator 101 for

adjusting the position of needle valve 104 extending in an axial direction from the throat portion to the outlet of the nozzle 22. See Fig. 3.

Any inquiry concerning this communication or earlier from the examiner should be directed to Mohammad M. Ali, whose telephone number is (703) 308-5032. The examiner can be reached from 6:15 am to 4:30pm from Monday to Friday.
